

# Supporting Veterans Administration Operating Rooms Through Technology Partnerships

Our mission at PREFCards has always been to bring smarter, more efficient surgical operations to healthcare facilities across the United States. As part of this commitment, we are proud to partner with established federal contracting technology providers to deliver our preference card and perioperative workflow solutions to **Veterans Administration (VA) hospitals**. Through these collaborations, VA surgical teams gain access to modern tools that improve accuracy, streamline case preparation, and enhance communication in the operating room.

For members of the U.S. federal government researching our technology or validating our solution, the following resources provide additional information. These include our listing in the VA Technical Reference Model (TRM), as well as details from our technology partners on digital surgeon preference cards and perioperative workflow platforms:

- **VA TRM Listing** - <https://www.oit.va.gov/Services/TRM/ToolPage.aspx?tid=16188>
- **LiveData PeriOp Manager – Surgeon Preference Cards** - <https://www.livedata.com/periop-manager/surgeon-preference-cards>
- **DSS LiveData Solutions** - <https://www.dssinc.com/live-data-solutions>

These links offer a deeper look into the capabilities, compliance, and federal readiness of our partners and the solutions we help support. If you are a federal program manager, contracting officer, or VA clinical leader seeking more information, we welcome you to explore these materials or contact us directly at **info@prefcards.com** or **(702) 879-8030**.
